- ✔ Over 40 years of manufacturing experience
- ✔ Award winning print quality
- ✔ Manufactured in the USA

MANUFACTURED IN THE USA with US & Global Materials

INTRODUCING

Stitched Edge FABRIC MATS

Our new Stitched Edge fabric mat expands the mat's use beyond counter mats into exciting new markets like Trading Card Game (TCG) mats, eSports game mats, and desk mats that pad both the keyboard and the mouse.

Image dye-sublimated permanently into the mat and the stitched edge.

Frame It®

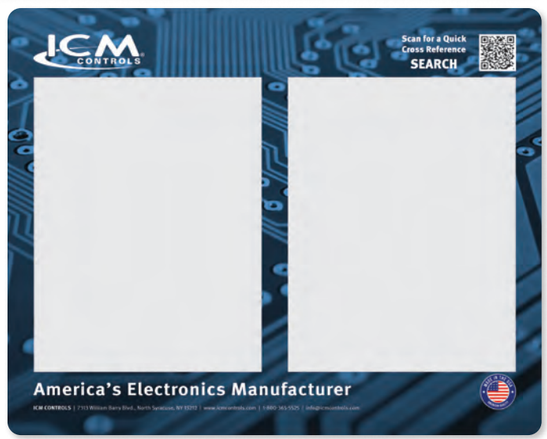

Easily update your promotion by simply changing an insert, keeping your content current and extending the life of the counter mat.

- ✔ Permanent message on the outside and interchangeable message on the inside
- ✔ Great for location-specific information and frequently changing pricing, menus, or promotions
- ✔ Easily build custom windows into the art
- ✔ Non-magnetic
- ✔ Made in USA with US & Global Materials

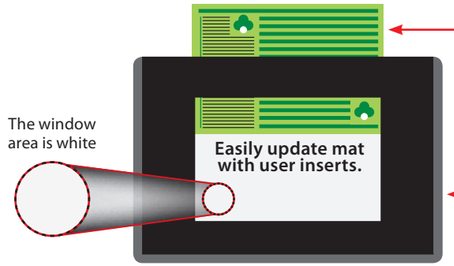

OUR INTERCHANGEABLE CONTENT COUNTER MAT

INSERT
Inserts are placed into a pocket created between the rubber backing and surface. Unless specified, inserts enter from the top. For dual pane window mats, inserts enter from each side. **When ordering, specify window size, insert size, and entry side.**

1" minimum glue area is required.

Change window content anytime!

PRODUCT SAFETY

✔CPSIA ✔Prop 65

Our products are tested by Bureau Veritas to ensure they conform to applicable CPSIA and Prop 65 safety standards. All of our products passed the applicable tests. Unless the counter mat is specifically targeted for children, a CPSIA Certificate of Conformity is not usually required. View our Certificate of Conformity in the Product Safety section of our website at CounterPointPromo.com/safety.

FREE PDF "PAPER" PROOF

- ✔Full color PDF to confirm the art received and used is correct
- ✔FREE – Emailed with every order & reorder
- ✔Sent within 24 hours of receipt of PO and usable art

When the FREE PDF "Paper" Proof is sent for "reference ONLY", it means production will begin without waiting for PDF proof approval. This PDF is not an accurate color proof – use for design reference only.

STANDARD LEAD TIME

Production begins the business day following receipt of PO and approved, usable art. Art that is not usable requires additional lead time. Production lead times are based on orders up to 2,500 pieces. For larger quantities, call for production times.

Packaging requires additional production time determined by the type of packaging required.

Order with Production Proof: Production time following proof approval is 6 days, 7 days for Frame-It® FLEX. Rush options may be available – see below

Traditional Mats	FREE PDF Proof
5-Days	For Reference Only
6-Days	Approval Required
Reorder 5-Days	For Reference Only

Frame-It® FLEX	FREE PDF Proof
6-Days	For Reference Only
7-Days	Approval Required
Reorder 6-Days	For Reference Only

RUSH SERVICES

Based on 1,000 piece order. See product options for rush service availability.

2-DAY	3-DAY	4-DAY	5-DAY	6-DAY
$100/v	$62.50/v	$50/v	$37.50/v	$25/v

Contact us for order verification. All order details, including PO, art which is usable without modification or change, shipping instructions, and payment arrangements must be received by Noon Pacific Standard Time. Art must conform to our Art Check List (see Last Page).

FREE PDF "Paper" Proof sent for reference ONLY. Add one day or $50/v for PDF approval if required. Quantities over 2,500 may incur additional charges – call for details.

Rush charges cover any special handling, overtime, and other factors necessary to meet a rush schedule. Order changes made after an order is submitted will affect delivery dates and rush charges may be incurred to maintain scheduled ship date.

PRODUCTION SPECS

Standard Production Time: Production begins the business day following receipt of PO and approved, output-ready art. Art that is not output-ready requires additional lead time. Standard lead times are based on orders up to 2,500 pieces. For larger quantities, call for production times.

5-DAY: PDF proof for reference only

6-DAY: PDF proof approval required

Reorder 5-DAY: PDF proof for reference only

Frame-It® FLEX: Add two days to above lead times

Custom Dies: Add three days to above lead times

Packaging: Production time determined by the type of packaging required

Order with Production Proof: Production time following proof approval is 8 days, 10 days for Frame-It® FLEX. Rush options are available.

Rush Orders: Contact us for order verification. All order details, including PO, art which is usable without modification or change, shipping instructions, and payment arrangements must be received by **Noon Pacific Standard Time**. Art must conform to our Art Check List (see Last Page) and must be usable without modification or change. Your order will not ship as requested if unusable art is submitted. See product options for rush service availability - based on 1,000 piece order. **FREE PDF "Paper" Proof sent for reference ONLY.** Add one day or $50/v for PDF approval if required. Quantities over 1,000 may incur additional charges.

2-Day Production: $100/v
3-Day Production: $62.50/v
4-Day Production: $50.00/v
5-Day Production: $37.50/v
6-Day Production: $25/v

See product options for rush service availability.

Rush charges cover any special handling, overtime and other factors necessary to meet a rush schedule. Order changes made after an order is submitted will affect delivery dates and rush charges may be incurred to maintain scheduled ship date. Additional rush charges, when required, are $50/v (minimum) per day rushed.

Pricing: All prices include up to a 4-Color print but exclude a set-up fee. All prices are subject to change without notice. To ensure you have the best possible price, contact your Product Specialist for an aggressive BottomLine™ quote.

Terms: Standard credit terms are Net 30 upon approved credit. A signed credit application is required. Terms for credit card payments are Net 10. Late payments will incur a 1½% per month late fee. Prepayment of initial order may be required.

Marketing: It is our practice to use overruns for samples and product images in our advertising. If this is not acceptable, please indicate this to us in writing.

Co–Op Programs: Co-op programs are happily considered. Contact your Product Specialist with details and CounterPoint® will develop a program to fit your needs. **Cancelled Orders:** If an order is cancelled, you are responsible for charges incurred up to the point of cancellation.

Important Note: Lead times and rush charges are based upon the receipt of final art approval and complete order instructions – not when an order is submitted. Art that is not usable usually requires additional lead time. Always allow time to acquire art and proof approval. Packaging or custom die requirements may also increase lead time.

Returns: Authorization is required prior to return of product. Unauthorized returns will not be accepted. No credit will be issued for product that cannot be returned.

Box Weights: Box weights may vary depending on the actual raw materials used. Some variation is normal and expected.

Custom Dies: Die/handling charge is usually $300/v, but may be more depending on the size and complexity of the pattern. All dies created by us remain factory property.

Multiple Destination Charge: The first two drop shipments are free. The charge for each additional location depends on the quantity per location. If each location is shipped in full-case multiples, the charge is $12.50/v per location. If each location is shipped the same non-standard case pack quantity, the charge is $18.75/v. If the quantity per location is different and requires non-standard case packs, the cost per location is $37.50/v. There will be an additional set-up charge of $31.25/v and additional lead time will be added to your order. Drop ship lists must be submitted in our Excel spreadsheet. Any instructions not present at the time of quoting may alter pricing when the actual instructions are received. Fulfillment charges are not included in the Multiple Destination charges. If a fulfillment quote is needed, please provide requirements.

Packaging: Standard CounterPoint® packaging is in bulk. Projects requiring non-standard case-packs will incur additional charges.

Minimum Order: See product pages for minimum order quantities.

Shortages & Overages: All orders are subject to 5% over or under run. Exact quantities incur a 10% surcharge.

Job Changes: Job change orders that occur once a project is in our system may incur additional or duplicate charges as applicable. Changes may also affect scheduled delivery dates. To avoid additional charges or delays, nail down all loose ends prior to job submission.

Shipping: F.O.B. Nevada. In accordance with the shipping terms of F.O.B., the responsibility of an order transfers to the customer when the order is shipped. Claims for shipping damage MUST be made by the customer when the shipment arrives. CounterPoint® accepts no responsibility or liability for carrier-caused delivery delays, problems, or product damages.

Important Note: Lead times and rush charges are based upon the receipt of final art approval and complete order instructions – not when an order is submitted. Art that is not usable usually requires additional lead time. Always allow time to acquire art and proof approval. Packaging or custom die requirements may also increase lead time.

GENERAL ART SPECS

The following, in conjunction with the "Art Check List" (Last Page), outlines the production specifications for the successful completion of your project.

Art Specifications: Art must be usable digital files and should conform to the art specifications found in our "Art Check List" on the Last Page. Changes made after production begins will incur additional charges.

Color Target: Send samples of printing or items to match for color when your order is placed. We can't match your target if we can't see it!

Art Services: Any time art must be created or modified, art services will be billed at $75/v per hour.

FREE PDF "PAPER" Proof: When the FREE PDF "Paper" Proof is sent for "reference ONLY", it means production will begin without waiting for PDF proof approval. This PDF is not an accurate color proof – use for design reference only.

Production Proof: $300/v. Production proofs are recommended whenever color matching is critical and may be required on larger orders.

Registration: Please allow ±1/16" registration variance of the print to the product perimeter.

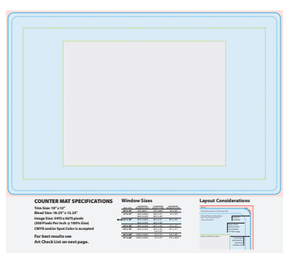

Email & FTP: Submit files smaller than 3Mb via email to your Product Specialist. Submit files up to 80Mb via the ftp upload utility at CounterPointPromo.com/upload. Remember to also send a printed sample of what you expect the art to look like. See our Art Check List (next page) for details on art submission.

Borders: When art includes a border or other art element that runs parallel to the counter mat's edges, the naked eye can distinguish slight variations in print positioning. For this reason, we do not recommend the use of a border because the nature of manufacturing limits registration capabilities to ±1/16".

Offset Lithography: All images submitted for hard surface counter mats are printed as submitted. Image resolution should be set at 300ppi. Remember that effective image resolution is decreased when an image is enlarged in a layout program; so, images should be 300ppi at 100% size in the final document.

While standard offset reproduces color and detail very well, the product surface can sometimes alter the color and appearance of the printed image. When color is critical, we always recommend a production proof. Fonts and type elements smaller than 8 point may not be readable.

PMS/Spot Colors: All PMS/Spot colors will be converted to 4-Color Process. When referencing a PMS color in a process color print, refer to a Pantone® COLOR BRIDGE® to see how the color translates when converted to CMYK. Most colors change when converted to CMYK.

Dye Sublimation: Sublimation is a specialized process that prints special heat activated inks on an advanced "transfer" paper. Heat and pressure are applied to the transfer, causing the ink to turn into a gas dye, which then sublimates into the fabric. Once the image is transferred, it is permanent and washable.

This heat activated ink transfer process produces a 100% to 400% dot gain, which impacts all reversed or "knocked out" art. When reversed elements are too small, the dot gain may fill in the reversed area or eliminate it completely. For this reason, we recommend all reversed type be set to bold. Serif fonts such as Times should be set at 18 point or greater and sans serif fonts like Helvetica should be set at 12 point or greater. All reversed lines should be 1.5 points or greater. Image resolution should be 300ppi. The sublimation process is designed to produce a "**pleasing**" representation – **not an exact match** – of the original.

During the sublimation printing process, a color target is used as a reference only. Color variation from a color target is normal and expected. When color is critical, we recommend a production proof.

Special Inks – Sublimation: All sublimation prints are created using 4-Color Process and 4-Color Process conversions for spot colors. Within the limits of sublimation, precise matching of PMS colors is not always possible. Metallic and fluorescent colors are not available. When color matching is critical, always order a production proof.

Original Size: All counter mats are initially cut to ordered size. However, since the fabric counter mats have a natural rubber base and the sublimation process uses high heat and pressure, the dimensions of the final product may vary from ordered size. This shrinkage and/or growth is a normal and expected effect of the sublimation process.

Color Conversion: Colors should be defined as either spot or CMYK (4-Color Process). All spot colors will be matched to the Pantone® COATED color guide. Converting spot or RGB colors to CMYK will change the appearance of the color, sometimes dramatically.

Copyrights & Confidentiality: Customers warrant that all images supplied for reproduction, whether digital, conventional or otherwise, are unencumbered by copyright and other usage rights connected to the image(s) and agree to hold harmless and indemnify CounterPoint® for all claims and expenses for any actions in law that may result from the use of these images. In regards to confidentiality, given the nature of our production processes and our waste streams we cannot guarantee there won't be a breach with 100% assurance. As a result, we have decided not to accept projects where a breach in confidentiality will have material or significant impact on anyone associated with the project.

Separations, Files, Plates, & Dies: All separations, digital files, plates, and dies created by CounterPoint® remain factory property. Our storage policy is to keep these materials on file for 24 months. After 24 months, reorders are treated as new jobs and require new art and set-ups. Original art is returned on request.

For best results submit your high resolution editable art using one of our templates.

CounterPointPromo.com/templates

Errors and Omissions: CounterPoint® makes every effort to ensure all information is complete and accurate. If there is inaccurate or incomplete information, we apologize but unconditionally reserve the right to correct any erroneous or missing language and information at any time, including erroneous prices. Further, CounterPoint® cannot and will not be responsible or liable for any damages, however described, that are caused as a result of said erroneous or missing information. If such an incident should occur, you will be notified of correct information as soon as it is reasonably possible after discovery.

Terms and Conditions: No terms or conditions of purchase orders different from the terms and conditions of seller (CounterPoint®) will become part of any sales agreement, purchase order, or other document unless it is specifically approved in writing. Our terms and conditions are part of our credit application. The credit application is available from your Product Specialist or Customer Service Representative or online at CounterPointPromo.com/downloads/Credit_Application.pdf and must be completed and approved prior to order processing. Whew! Life is too short for this legal jargon but such is the world today!

✓ART CHECK LIST

A quick test to ensure success! Art and digital files that pass this pre-flight "test" usually flow through our system with ease. These guidelines are also explained in detail at CounterPointPromo.com/production.

1 Layout

✓1/8" Bleed when art extends off of the mat
✓Critical elements at least 1/4" inside mat's edge

2 Image Resolution

Image resolution MUST be 300ppi or higher. EVERY file used to create the final piece MUST be included and editable. This includes linked or placed files.

✓Save images at 300ppi/dpi, sized to 100%
✓Save images as .psd, .tif, .eps, or .ai files
✓Include editable versions of ***all*** files

3 Fonts

✓For Sublimation: at least 18pt serif, 12pt sans-serif
✓For Offset and UV Ink Jet: at least 8pt
✓All reversed type set to bold
✓Convert all fonts to outlines/curves
✓Include all Screen & Printer fonts

4 File Formats

✓InDesign® ✓Hi-Res PDF ✓Photoshop® ✓Illustrator®

Word, Publisher, PowerPoint, and Excel are not acceptable file formats.

5 Art Submission

✓FTP: CounterPointPromo.com/upload (3-80Mb)
✓Email your Product Specialist directly (<3Mb)

6 Color Target / Output Sample

Include a complete, full sized hard copy of the composite art submitted. These may be color or black & white, but must be printed from the final file(s) you provide. Print 4-Color Process targets using calibrated output devices.

✓Calibrated Color Target ✓Black & White
✓COATED PMS Color Callout

7 Colors – Process & PMS

All PMS/Spot colors will be converted to 4-Color Process. When referencing a PMS color in a process color print, refer to a Pantone® COLOR BRIDGE® coated guide to see how the color translates when converted to CMYK. Most colors change when converted to CMYK.

✓CMYK 4-Color Process

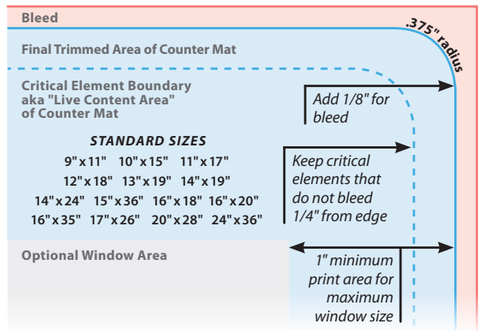

8 Design Tips

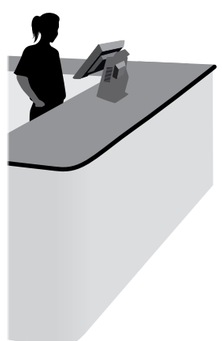

✓Avoid small type and other thin elements for fabric counter mats
✓Include all files, including fonts and images
✓Avoid borders, text, and art elements that run close to and parallel to the mat's edge
✓Convert fonts to outlines/curves
✓For a list of standard fonts available for typesetting, visit CounterPointPromo.com/fonts
✓Supply a printed copy of the final layout and color samples or color targets

9 Corner Radius

✓Standard corner radius is 3/8" (.375")
✓Any other corner radius requires a custom die
✓Square corners are NOT recommended

10 Layout Considerations
